ENERGY STUDIES

Yale Climate & Energy Institute (YCEI) sponsors the Energy Studies Undergraduate Scholars program. The program promotes a multidisciplinary approach to the linked challenges of energy and climate, and provides students with training in the science and technology of energy, the environmental and social impacts of energy production and use, and the economics, planning, and regulation of energy systems and markets. Energy Studies Scholars acquire the broad knowledge and skills needed for advanced studies and for leadership in energy-related fields.

In addition to their participation in the program, Energy Studies Scholars must complete the requirements of a Yale College major. Yale College does not offer a major in energy studies.

Admission to the Energy Studies Undergraduate Scholars program is by application, normally in the second term of the sophomore year. Accepted students are assigned an adviser from the YCEI faculty. Upon successful completion of the program, students receive a letter from YCEI acknowledging their participation in the program and are invited to attend the annual Yale Alumni in Energy Conference.

For additional information, including program requirements and application instructions, visit the YCEI Web site (climate.yale.edu/prog-init/undergraduate-scholars-energy-studies).
