The sophomore advising program has the following features:

1. The Yale College Dean’s Office will continue to direct a program of sophomore advising during the current academic year, alongside the
2. Goals listed for your department may help you present your department’s curriculum and objectives to potential interested students.
3. A good resource for non-majors and majors alike is the 2015 Yale College Dean’s Office report, “Goals for All Yale College Majors.”
4. Make certain, therefore, that departmental advisers are thoroughly conversant with your department’s curriculum.
5. If your program has them, about any matter connected with the department’s courses or programs. You should
6. The departmental representative advises undergraduate majors in the college and approves their course schedules at the beginning of each term.
7. If a college does not have in its fellowship a member of the departmental faculty who is available for advising, you should not hesitate to recommend to the head of the college the name of a colleague who would be a good adviser.
8. A new member of the full-time faculty is eligible to be elected to a college fellowship after one term of teaching at Yale.
9. If you delegate to departmental advisers the responsibility of approving course schedules, you should keep in mind that you have made them partners in the job of enforcing the requirements of the major. Make certain that they are thoroughly conversant with these requirements, and keep them informed of changes in the undergraduate curriculum.
10. If only certain faculty signatures are valid on students’ course schedules, the University Registrar’s Office and the residential college deans should be so informed.
11. Your Department Student Advisory Committee might also play a role in the advising of majors, as peer liaisons. Such peer liaisons would be expected to be most useful for giving fellow students a sense of the experience of majoring in your field and practical advice on navigating the requirements and electives in your department or program. In no case may peer liaisons review course schedules for the term, authorize waivers or other exceptions, or officially assess progress towards completion of the major. In addition, they are unpaid. Peer liaisons may make themselves available through e-mail, informal meetings, or “office hours” in a departmental lounge or other suitable space.
12. The DUS and the departmental advisers have the important and substantial task of advising interested non-majors, especially first-year students and sophomores, about the department’s courses and programs. Many departments have developed systematic methods of such advising, such as holding a meeting at the beginning of the fall or spring term for students tentatively interested in entering the major, but for others the DUS and departmental representatives respond to the initiative of individual students who make inquiries. All DUSes have the opportunity to participate in the Academic Fair, run by the Office of Academic Affairs and held annually on the Tuesday before the first day of fall classes. First-year and other incoming students, such as transfer students and Eli Whitney students, are directed by their residential college deans to attend the Academic Fair to learn about Yale’s subject offerings and seek answers to questions about placement, preregistration, and major requirements.
13. First-year students are advised by “college advisers” (faculty and staff) drawn from the fellowships of their residential colleges. These advisers are assigned by the dean of the residential college and are charged with holistic advising. It is expected that specific course- and major-related advising will come from the departments themselves, often from the DUSes. Thus you may expect questions at the beginning of the fall and spring terms from college advisers and from first-year students themselves; their questions about the department’s course offerings will frequently concern matters of placement. First-year students are also encouraged to consult departmental advisers, if your program has them, about any matter connected with the department’s courses or programs. You should make certain, therefore, that departmental advisers are thoroughly conversant with your department’s curriculum.
14. A good resource for non-majors and majors alike is the 2015 Yale College Dean’s Office report, “Goals for All Yale College Majors.” The goals listed for your department may help you present your department’s curriculum and objectives to potential interested students.
15. The Yale College Dean’s Office will continue to direct a program of sophomore advising during the current academic year, alongside the new College advising system, until the latter is fully implemented. The sophomore advising program has the following features:
   1. Except for sophomores majoring in engineering, mathematics, or the natural sciences, whose advisers are stipulated by their departments, a sophomore may choose as an adviser any member of the faculty or dean in the Yale College Dean’s Office who is willing to counsel him or her.
   2. Sophomores are instructed to discuss their course schedules carefully with their advisers each term.
Questions about sophomore advising should be directed to Risa Sodi (risa.sodi@yale.edu), Assistant Dean of Academic Affairs and Director of Advising and Special Programs in Yale College.

For the most part, therefore, the college and sophomore advising systems do not require much initiative from you as DUS, though you and your departmental advisers should plan on responding to a number of inquiries from or on behalf of first-year students and sophomores, particularly at the beginning of a term and at the time when those students begin to select a major.
