DEADLINES AND UPDATES

The schedule of deadlines for the YCPS is usually sent out in early January, with the deadline for copy submission for the program overview and first-year tab falling in mid-February, about the fourth or fifth week of the spring term.

After the initial copy submission in February, changes can be made to course and program information until a second deadline, typically around the end of March. Some changes are difficult to make late in the editing cycle, and all updates are subject to editorial approval. Program descriptions, once published, may not be changed until the following academic year.
