The Yale Center for Environmental Law & Policy, a joint undertaking between Yale Law School and the Yale School of Forestry & Environmental Studies, advances fresh thinking and analytically rigorous approaches to environmental decision-making across disciplines, sectors, and scales. In addition to its research activities, the center aims to foster discussion and collaboration across the Yale campus on environmental law and policy issues at the local, regional, national, and global levels. Its recent projects include the biennial Environmental Performance Index (http://epi.envirocenter.yale.edu), which ranks countries on performance indicators tracked across policy categories covering both environmental public health and ecosystem vitality, as well as initiatives on Sustainable Finance, Trade and Climate Change, Rethinking Environmental Protection for the 21st Century, Corporate Sustainability, and Climate Change Governance. The center facilitates a joint-degree program in which Yale Law students can simultaneously pursue a master's degree at the Yale School of Forestry & Environmental Studies, completing both degrees in four years. The center provides research, educational, career development, and social opportunities for students enrolled in the joint program as well as others affiliated with the center. For additional information, visit http://envirocenter.yale.edu.
