

RESOURCES FOR TEACHING AND LEARNING

Yale Center for Teaching and Learning (CTL) promotes and develops the use of technology used in support of teaching and learning. In collaboration with Yale Information Technology Services (ITS) and Yale University Libraries, they provide services that enable faculty and students to effectively collaborate and share information through the use of technologies. Yale University Center's include the Center for Research Computing, the Center for Science and Social Science Information, StatLab, the Film Study Center, and the Student Technology Collaborative.

Canvas @ Yale is a cloud-based learning management system (LMS) that is designed to support teaching and learning; it has replaced Classes*v2 for all active courses. Online and blended course programs at Yale have been using Canvas for more than three years. Canvas @ Yale includes features such as announcements, syllabi, course resources, discussion forums, assignments, online tests and quizzes, and course rosters with student photos. Course sites are automatically created for all courses listed in the University Registrar's Office system. Faculty and students log on to Canvas @ Yale with their Yale NetID and password. For assistance, consult Canvas @ Yale online help or email canvas@yale.ed (canvas@yale.edu).

Classes*v2 will remain available for reference purposes until May 2019.

For more information on what resources are available to instructors for teaching and learning, please contact the Yale Center for Teaching and Learning.
