RESOURCES FOR TEACHING AND LEARNING

Yale Center for Teaching and Learning (http://ctl.yale.edu/using-technology) (CTL) promotes and develops the use of technology used in support of teaching and learning. In collaboration with Yale Information Technology Services (http://its.yale.edu) (ITS) and Yale University Libraries (http://web.library.yale.edu), they provide services that enable faculty and students to effectively collaborate and share information through the use of technologies. Yale University Center’s include the Center for Research Computing (http://research.computing.yale.edu), the Center for Science and Social Science Information (http://csssi.yale.edu), StatLab (http://statlab.stat.yale.edu), the Film Study Center (http://its.yale.edu/centers/film-study-center), and the Student Technology Collaborative (http://its.yale.edu/centers/student-technology-collaborative).

Instructor’s at Yale have access to Classes*v2 (https://classesv2.yale.edu/portal), an integrated set of Web-based tools for teaching, learning, and sharing information. Classes*v2 includes features such as announcements, syllabi, course resources, e-mail lists, discussion forums, assignments, drop boxes for student homework, and course rosters with student photos. Course sites are automatically created for all courses listed in the University Registrar’s Office system. Faculty and students log on to Classes*v2 with their Yale NetID and password. Instructors may also request “project sites” for collaboration with others or for departmental use. For more information about Classes*v2, please refer to the Classes*v2 online help (http://help.classesv2.yale.edu) or e-mail classesv2@yale.edu.

For more information on what resources are available to instructors for teaching and learning, please contact the Yale Center for Teaching and Learning (http://ctl.yale.edu/contact).
