JOINT DEGREES

JOINT DEGREES IN NURSING AND DIVINITY

In recognition of the relationship between nursing and religious studies, the Yale School of Nursing and the Yale Divinity School offer a joint-degree program in nursing and divinity. This option, established in 2003, is especially oriented to individuals who wish to combine careers in advanced nursing practice and social ministry that might involve direct practice, planning, and policy making in a variety of health care systems. There are two joint-degree options between the Divinity School and the School of Nursing. The first option, a joint degree leading to the Master of Science in Nursing (M.S.N.) and the Master of Arts in Religion (M.A.R.), requires three years of study (four years for students in the Graduate Entry Prespecialty in Nursing [GEPN]). The second option, a joint degree leading to the M.S.N. and Master of Divinity (M.Div.), requires four years of study (five years for GEPN students) and is designed for those students who wish to prepare for the lay or ordained ministries of Christian churches. Admissions decisions are made independently by the Divinity School and the School of Nursing. Students are required to apply simultaneously to both schools. Applicants must indicate on each application form that they are applying to the joint-degree program. This joint-degree program is not open to YSN students enrolled in or applying to the Midwifery/Women’s Health Nurse Practitioner specialty. All applicants must meet with the associate dean of student life and the specialty director prior to applying to discuss the feasibility of the program of study. More information, including the Joint Degree Agreement between the Yale School of Nursing and the Yale Divinity School, can be found at https://nursing.yale.edu/admissions/how-apply/joint-degrees.

JOINT DEGREES IN NURSING AND PUBLIC HEALTH

Recognizing the relationship between nursing and public health, the Yale School of Nursing and the Yale School of Public Health offer a joint-degree program in nursing and public health. This option, established in 1997, is especially oriented to individuals who wish to combine careers in advanced nursing practice and public health that might involve direct practice, planning, and policy making in a variety of health care systems in the public health sector. The joint-degree program requires three years of study (four years for students in the Graduate Entry Prespecialty in Nursing) and awards a Master of Science in Nursing (M.S.N.) and a Master of Public Health (M.P.H.). Admissions decisions are made independently by the School of Public Health and the School of Nursing. Students are required to apply simultaneously to both schools. Applicants must indicate on each application form that they are applying to the joint-degree program. This joint-degree program is not open to YSN students enrolled in or applying to the Midwifery/Women’s Health Nurse Practitioner specialty. All students are required to begin their first academic year at the School of Public Health. More information, including the Joint Degree Agreement between the Yale School of Nursing and the Yale School of Public Health, can be found at https://nursing.yale.edu/admissions/how-apply/joint-degrees.

M.S.N./PH.D. JOINT-DEGREE PROGRAM

This joint-degree program, established in 2018, combines the two-year Master of Science in Nursing degree from the Yale School of Nursing and the Ph.D. in Nursing from the Yale Graduate School of Arts and Sciences. It allows students to complete requirements for both degrees in five years. Applicants for admission to the joint program must be admitted to both schools. Students typically enter the joint program at matriculation, but M.S.N. students who are completing the Research Concentration may apply to the Ph.D. program while enrolled in the fall of year two of the M.S.N. degree. Upon enrollment, the student is assigned a Ph.D. adviser who will work closely with the student to determine a plan of study, course selection (aligned with the student's research interests), and the development of research ideas. The first two years of the program are spent in the School of Nursing, completing all requirements for the M.S.N. degree. In the second year, students will complete the Research Concentration, which provides mentored research experience and the development of a research proposal. The M.S.N. Research Concentration will fulfill one half of the first-term Research Assistantship in the Ph.D. program. Students are eligible to take Graduate School courses while enrolled at the School of Nursing, with up to three courses counting toward both degrees. One didactic or clinical course, aligned with the student's proposed research topic, may count as a cognate course toward the Ph.D. Students may have the opportunity to undertake additional mentored research experiences in the summers following years one and two, including research assistantship hours.

The minimum residence requirement in the program is five years. The tuition requirement is two years in the School of Nursing and three years in the Graduate School. Financial aid is awarded by each school according to its own criteria. While enrolled at the School of Nursing, students are eligible to compete for financial aid available to master’s students, but are not eligible for Graduate School aid. Once they have completed the M.S.N. degree and enroll in the Graduate School in year three, students in the joint-degree program receive a full doctoral financial aid package during those terms in which they are enrolled in the Graduate School, including up to three years of tuition, stipend, and a health award to cover the cost of Yale Health Hospitalization/Specialty Coverage. Students are expected to complete the joint-degree program within six years.

The M.S.N. and Ph.D. degrees are awarded separately, upon completion of the M.S.N. requirements (at the end of the second year of study in the M.S.N program by the School of Nursing), and upon completion of the requirements for the Ph.D. by the Graduate School of Arts and Sciences. To qualify for the M.S.N. and Ph.D. degrees, students must satisfy all degree requirements of both schools. Any exception to this pattern of study must be approved by the director of graduate studies and the appropriate associate dean.
