* **EP&E 214a or b, Classics of Ethics, Politics, and Economics**  Boris Kapustin  
A critical examination of classic and contemporary works that treat problems of ethics, politics, and economics through the lens of African-American thought and to grasp how African-American thinkers have deepened our understanding of the interaction between race and socioeconomic debates and controversies throughout U.S. history. Far from being a univocal tradition, African-American thought encompasses a rich variety of intellectual perspectives that have critically assessed the impact of slavery, education, capitalism, and religion, among a number of topics, on African-Americans. While the study of American racial relations can include a wide range of topics, our thematic focus remains on the ethical, political, sociological, and economic dimensions of African-American experiences from the eighteenth century to the present day. This inquiry further prompts us to reflect on the various conceptions of liberty, justice, and equality that have informed the Declaration of Independence and U.S. Constitution and that lie at the core of intellectual discussion over race in American history. The purpose of this course is to examine the interdisciplinary subjects of ethics, politics, and economics through the lens of African-American thought and to grasp how African-American thinkers have deepened our understanding of the interaction between race and socioeconomic debates and controversies throughout U.S. history. The purpose of this course is to explore the intellectual origins of liberalism and conservatism through an EP&E framework. We discuss the tensions between collective wisdom and individual reason in the early modern period and survey the thought of thinkers in the proto-liberal and proto-conservative traditions, such as Thomas Hobbes and John Locke on sovereignty, individual autonomy, reason, and toleration; and Robert Filmer, Richard Hooker, and David Hume on order, custom, and utility. Our main object of inquiry, however, is the intellectual division that emerged between supporters and critics of the French Revolution, the historical event that prompted the modern political identities of liberalism and conservatism. Accordingly, we examine the political, moral, and economic theories of the Revolution; reactions to the Revolution from Edmund Burke, Joseph de Maistre, and other counterrevolutionaries; critical responses to their reactions, including those from Thomas Paine, Mary Wollstonecraft, and James Mackintosh; and the impact of this debate on the evolution of liberalism and conservatism in the nineteenth and twentieth centuries in Europe and the United States. Class discussions and readings confront liberal and conservative perspectives on human nature; reason; freedom; tradition; individual rights; religion; the Enlightenment; market economies; democratic participation; and equality.
