ARCHITECTURE

Director of undergraduate studies: Bimal Mendis (bimal.mendis@yale.edu), 328 RDH, 432-8325; architecture.yale.edu

Architecture is a humanistic endeavor. The purpose of the undergraduate major is to include the study of architecture within a comprehensive liberal arts education, drawing from the broader academic and professional environment of the Yale School of Architecture. The curriculum includes work in design; in history, theory, and criticism of architecture; and in urbanism (urban studies), and leads to a bachelor of arts degree with a major in Architecture. As a liberal arts major in Yale College, it is not an accredited professional degree program. For accredited professional degree programs, refer to the requirements of the National Architectural Accrediting Board (NAAB).

INTRODUCTORY COURSES FOR NONMAJORS AND MAJORS

Introductory courses are ARCH 150, 200, and 280. They are open to all Yale College students and are required for those interested in the Architecture major prior to application. Interested students may also consider courses such as ARCH 260, 262, 312, or STCY 176.

PREREQUISITES

Three courses are prerequisite for all concentrations: ARCH 150, 200, and 280.

REQUIREMENTS OF THE MAJOR

Students majoring in Architecture are required to take fifteen course credits, including prerequisites and the senior requirement. Majors are expected to take the three prerequisites by the end of their sophomore year and to complete a core of four courses, for five course credits, by the end of their junior year. They must also base their studies in one of three areas of concentration: Design; History, Theory, and Criticism; or Urbanism (Urban Studies). (For the Class of 2022 and subsequent classes the Urban Studies concentration will be called Urbanism). Majors are also required to complete three orientation sessions: digital media orientation, library orientation, and shop orientation. Within the concentrations, electives are categorized under four broad subject areas: history and theory of architecture; urbanism and landscape; materials and design; and structures and computation.

Design concentration  The Design concentration explores the role of architecture in shaping the world around us. It introduces complex processes involved in solving spatial and programmatic problems. Creative work is grounded in the study of history and culture, and in the analysis of social conditions influencing architecture. Design studios provide a forum for production and discourse. Studio projects address issues of architectural form, space, composition, site, tectonics, and programs within broader humanistic ideals.

For the Design concentration, the following additional courses are required:

1. A core of four courses: the studio courses ARCH 250 and 251 taken during the junior year after the student is accepted into the major; and the history of architecture surveys ARCH 260, and 262 or 312, to be completed by the end of the junior year
2. One elective in history and theory of architecture chosen from ARCH 341, 348, 431, or other relevant course in History of Art approved by the DUS
3. One elective in urbanism and landscape chosen from ARCH 344, 345, 347, 348, 385, STCY 176, or other relevant course in American Studies; Ethics, Politics, and Economics; Environmental Studies; or Political Science approved by the director of undergraduate studies (DUS)
4. One elective in materials and design chosen from ARCH 162 or another relevant course in Environmental Studies approved by the DUS
5. One elective in structures and computation chosen from ARCH 161, an approved calculus or physics course, or other relevant course approved by the DUS. (Elementary calculus is strongly recommended as preparation for graduate studies in architecture.)
6. The senior requirement, ARCH 450 and 494

History, Theory, and Criticism concentration  The History, Theory, and Criticism concentration is intended to establish a broad historical and intellectual framework for the study of architecture. An interdisciplinary approach is encouraged through additional courses taken in various fields of humanities and social sciences. Normally these interdisciplinary courses address subjects closely linked to architectural history, theory, and criticism. Such courses may include archaeology, history of religion, aesthetics, philosophy, or visual culture. Permission of the DUS is required if the courses fall outside the specified course of studies. During their senior year students complete a written senior essay on a topic approved by the faculty.

For the History, Theory, and Criticism concentration, the following additional courses are required:

1. A core of four courses: the urban laboratory, ARCH 360 taken during the fall term of junior year; ARCH 362 or an elective taken during the spring term of junior year; and the history of architecture surveys ARCH 260, and 262 or 312 to be completed by the end of junior year
2. Four electives in history and theory of architecture, chosen from ARCH 341, 348, 431, or other relevant courses in History of Art approved by the DUS
3. One elective in urbanism and landscape chosen from ARCH 344, 345, 347, 348, 385, STCY 176, or other relevant course in American Studies; Ethics, Politics, and Economics; Environmental Studies; or Political Science approved by the DUS
4. The senior requirement ARCH 490 and 491

**Urbanism (Urban Studies) concentration** For the Class of 2022 and subsequent classes the Urban Studies concentration will be called Urbanism. The Urbanism (Urban Studies) concentration encourages a broad, interdisciplinary investigation of the complex forces that shape the urban physical environment. The sequence of courses culminates in a senior essay that builds on course work, and either develops analysis and planning proposals for a specific site or furthers an individual research agenda.

For the Urbanism (Urban Studies) concentration, the following additional courses are required:

1. A core of four courses: ARCH 360 and 362 taken during the junior year; and ARCH 341 and 345, to be completed by the end of the junior year
2. Four electives in urbanism and landscape chosen from ARCH 344, 345, 347, 348, 385, STCY 176, or other relevant courses in American Studies; Ethics, Politics, and Economics; Environmental Studies; or Political Science approved by the DUS
3. One elective in history and theory of architecture chosen from ARCH 341, 348, 431, or other relevant course in History of Art approved by the DUS
4. The senior requirement, ARCH 490 and 491

**Digital media orientation** All Architecture students are required to complete orientation sessions in digital media workshop and materials laboratory. Students enrolled in ARCH 200 are required to complete these sessions at the beginning of the spring term of the sophomore year. Access to digital media equipment will not be allowed until the required orientation sessions have been completed. Questions should be addressed to the DUS or the manager of digital media, Vincent Guerrero (vincent.guerrero@yale.edu), 432-7552.

**Library orientation** The Architecture program requires all students to complete a ninety-minute introductory library research session. Students enrolled in ARCH 200 must take this session at the beginning of the spring term of the sophomore year. Failure to complete the required orientation will preclude completion of the major. Students may offer no substitutions for this orientation. Students should register with the Haas Family Arts Library Public Services Librarian, Lindsay King (lindsay.king@yale.edu), 436-8052. Questions should be addressed to the DUS.

**Shop orientation** The Architecture program requires all majors to complete several woodshop and materials lab orientation sessions. Students who are enrolled in ARCH 200, and who are interested in using the shop, must take these sessions during the first weeks of the spring term of the sophomore year. Access to the woodshop and materials lab will not be allowed until the required orientation sessions have been completed. Questions should be addressed to the DUS or to the shop coordinator, Timothy Newton (timothy.newton@yale.edu), 432-7234.

**SENIOR REQUIREMENT**
Seniors in the Design track take ARCH 450 in the fall term and 494 in the spring term. Seniors in the History, Theory, and Criticism track and in the Urbanism (Urban Studies) track take ARCH 490 in the fall term and 491 in the spring term. Proposals for senior projects and essays are submitted in the fall term for review and approval by the senior project coordinator; they are then distributed to faculty members for review. Upon successful review, students may ask faculty members to act as senior advisers. Senior essays and projects for ARCH 491 are due in the office of the DUS by May 1, 2020. Design projects for ARCH 494 are due as specified by the course instructor. All seniors must submit a portfolio of their work to the office of the DUS by May 1, 2020. For all architecture majors, this portfolio must be representative of the student’s design work including prerequisites and the senior project. History, Theory, and Criticism majors and Urbanism (Urban Studies) majors must also include a copy of the senior essay and other appropriate texts.

**ADVISING AND DECLARATION OF INTENT TO MAJOR**
Yale College students interested in the Architecture major must submit a Declaration of Intent to Major during the spring term of their sophomore year, after taking ARCH 150, 200, and 280. The Declaration of Intent to Major must be submitted to the office of the DUS no later than 4 p.m. on March 27, 2020, in 328 Rudolph (third floor), and must include the following information: name, address, telephone number, courses related to architecture already taken, and a statement of purpose. Students should also indicate their desired concentration at this time. Additionally, by May 1, 2020 students must submit an electronic portfolio representative of coursework for ARCH 150, 200, and a paper from ARCH 280. Upon the successful completion of these requirements, students are notified in writing regarding their acceptance to the major by May 31, 2020.

**Courses in the School of Architecture** Unless otherwise indicated in the course descriptions, all courses in the School of Architecture are open to majors and nonmajors with permission of the instructor and the graduate registrar. They are not available for the Credit/D/Fail option. Students are admitted on the basis of their previous course work and previous performance.

**REQUIREMENTS OF THE MAJOR**

**Prerequisites** ARCH 150, 200, and 280

**Number of courses** 15 course credits (incl prereqs and senior req)

**Specific courses required**
- **Design** — ARCH 250, 351; 260; and 262 or 312; **History, Theory, and Criticism** — ARCH 360; 362 or elective; ARCH 260; and 262 or 312; **Urbanism (Urban Studies)** — ARCH 360, 362; 341, 345
Distribution of courses  Design — 1 elective in history and theory of arch, 1 in urbanism and landscape, 1 in materials and design, 1 in structures and computation, all approved by DUS; History, Theory, and Criticism — 4 electives in history and theory of arch, 1 in urbanism and landscape, all approved by DUS; Urbanism (Urban Studies) — 4 electives in urbanism and landscape, 1 in history and theory of arch, all approved by DUS.

Other  Orientation sessions in digital media, library, and shop.

Senior requirement  All concentrations — portfolio representative of design work, including prereqs and senior req; Design — ARCH 450 and 494; History, Theory, and Criticism and Urbanism (Urban Studies) — ARCH 490 and 491.

MEMBERS OF THE SCHOOL OF ARCHITECTURE TEACHING IN YALE COLLEGE

Professors  Turner Brooks (Adjunct), Keller Easterling, Alexander Garvin (Adjunct), Steven Harris (Adjunct), Alan Plattus, Alexander Purves (Emeritus)

Associate Professor  Eeva-Liisa Pelkonen

Assistant Professors  Sunil Bald (Adjunct), Jesse LeCavalier (Visiting), Bimal Mendis (Adjunct), Kyoung Sun Moon, Elihu Rubin

Lecturers  Victor Agran, Erleen Hatfield

Critics  Marta Justo Caldeira, Katherine Davies, Kyle Dugdale, Andrei Harwell, Adam Hopfner, Joyce Hsiang, Timothy Newton

Courses

* ARCH 006a, Architectures of Urbanism: Thinking, Seeing, Writing the City  Michael Schlabs
  What is architecture, and how is it conceived, relative to notions of the urban — to the broader, deeper, messier web of ideas, forms, and fantasies constituting “the city”? Can architecture play a role in defining the city, as such, or does the city’s political and social construction place it outside the scope of specifically architectural concerns? Likewise, what role can the city play in establishing, interrogating, and extrapolating the limits of architecture, whether as a practice, a discourse, or a physical manifestation of human endeavor in the material environment? This course addresses these and other related questions, seeking to position architecture in its broader urban, social, cultural, political, intellectual, and aesthetic contexts. In so doing, it assumes the position that the nature and character of the urban can largely be characterized in terms of the manner in which we, as a society, conceive, construct, and contribute to notions of “the public,” or “the common.” Enrollment limited to first-year students. Preregistration required; see under First-Year Seminar Program. Prerequisite: general knowledge of 20th-century history.  HU

ARCH 150a, Introduction to Architecture  Alexander Purves
  Lectures and readings in the language of architecture. Architectural vocabulary, elements, functions, and ideals. Notebooks and projects required. Not open to freshmen. Required for all Architecture majors.  HU

* ARCH 154b, Drawing Architecture  Victor Agran
  Introduction to the visual and analytical skills necessary to communicate architectural ideas. Observation and documentation of architectural space on the Yale campus. Drawing exercises introduce the conventions of architectural representation: plan, section, elevation, and isometric drawings, as well as freehand perceptual drawings of architectural space. Open to first and second year students.

* ARCH 161a, Introduction to Structures  Erleen Hatfield
  Basic principles governing the behavior of building structures. Developments in structural form combined with the study of force systems, laws of statics, and mechanics of materials and members and their application to a variety of structural systems. Prerequisites: trigonometry and some knowledge of calculus. Enrollment limited to 20.  QR, SC

* ARCH 162b, Materials in Architecture  Timothy Newton
  Science and technology of basic building materials studied together with historic and current design applications. Skills and processes required to create, shape, and connect materials experienced through hands-on projects. Technical notebooks, drawings, design and build exercises, and projects required. Enrollment limited to 20.

ARCH 200b / URBN 200b, Scales of Design  Bimal Mendis
  Exploration of architecture and urbanism at multiple scales from the human to the world. Consideration of how design influences and shapes the material and conceptual spheres through four distinct subjects: the human, the building, the city, and the world. Examination of the role of architects, as designers, in constructing and shaping the inhabited and urban world. Lectures, readings, reviews and four assignments that address the spatial and visual ramifications of design. Not open to first-year students. Required for all Architecture majors.  HU

* ARCH 230b / STCY 176b / URBN 230, Introduction to the Study of the City  Alexander Garvin
  An examination of forces shaping American cities and strategies for dealing with them. Topics include housing, commercial development, parks, zoning, urban renewal, landmark preservation, new towns, and suburbs. The course includes games, simulated problems, fieldwork, lectures, and discussion.  SO

* ARCH 250a, Methods and Form in Architecture I  Katherine Davies
  Analysis of architectural design of specific places and structures. Analysis is governed by principles of form in landscape, program, ornament, and space, and includes design methods and techniques. Readings and studio exercises required. Enrollment limited to 25. Open only to Architecture majors.  1 ½ Course cr
* ARCH 251b, Methods and Form in Architecture II  Michael Schlabs
Continuation of ARCH 250. Analysis of architectural design of specific places and structures. Analysis is governed by principles of form in landscape, program, ornament, and space, and includes design methods and techniques. Readings and studio exercises required. 1½ Course cr

ARCH 260a / HSAR 326a, History of Architecture I: Antiquity to the Baroque  Kyle Dugdale
The first half of a two-term sequence in the history of architecture. Architecture and urbanism from ancient Egypt through Greek and Roman classical traditions to the Enlightenment. The formal expression—organizational, structural, and ornamental—and social context of specific buildings and urban areas. Architecture as a form of social expression that builds on its own stylistic development, articulating a response to changes in history and culture. Emphasis on Western architecture, with selections from other parts of the world.  HU

ARCH 280b / AMST 197b / HSAR 219b / URBN 280b, American Architecture and Urbanism  Elihu Rubin
Introduction to the study of buildings, architects, architectural styles, and urban landscapes, viewed in their economic, political, social, and cultural contexts, from precolonial times to the present. Topics include: public and private investment in the built environment; the history of housing in America; the organization of architectural practice; race, gender, ethnicity and the right to the city; the social and political nature of city building; and the transnational nature of American architecture.  HU

ARCH 312b / HSAR 312b, Modern Architecture in a Global Context, 1750-present  Craig Buckley
Architects, movements, and buildings central to the development of modern architecture from the mid eighteenth century through to the present. Common threads and differing conceptions of modern architecture around the globe. The relationship of architecture to urban transformation; the formulation of new typologies; architects' responses to new technologies and materials; changes in regimes of representation and media. Architects include Claude Nicolas Ledoux, Giovanni Battista Piranesi, John Soane, Frank Lloyd Wright, Le Corbusier, Ludwig Mies van der Rohe, Lina Bo Bardi, Louis Kahn, and Kenzo Tange.  HU

* ARCH 341b / GLBL 253b / LAST 318b / URBN 341b, Globalization Space  Keller Easterling
Infrastructure space as a primary medium of change in global polity. Networks of trade, energy, communication, transportation, spatial products, finance, management, and labor, as well as new strains of political opportunity that reside within their spatial disposition. Case studies include free zones and automated ports around the world, satellite urbanism in South Asia, high-speed rail in Japan and the Middle East, agripoles in southern Spain, fiber optic submarine cable in East Africa, spatial products of tourism in North Korea, and management platforms of the International Organization for Standardization.  HU

ARCH 345a / URBN 345a, Civic Art: Introduction to Urban Design  Alan Plattus
Introduction to the history, analysis, and design of the urban landscape. Principles, processes, and contemporary theories of urban design; relationships between individual buildings, groups of buildings, and their larger physical and cultural contexts. Case studies from New Haven and other world cities.  HU

* ARCH 353a / URBN 353a, Urban Field Geography  Elihu Rubin
A methods seminar in urban field geography. Traveling on foot, students engage in on-site study of architecture, urban planning and design, cultural landscapes, and spatial patterns in the city. Learn how to "read" the urban landscape, the intersection of forces that have produced the built environment over time.  HU

* ARCH 360b / URBN 360b, Urban Lab: An Urban World  Joyce Hsiang
Understanding the urban environment through methods of research, spatial analysis, and diverse means of representation that address historical, social, political, and environmental issues that consider design at the scale of the entire world. Through timelines, maps, diagrams, collages and film, students frame a unique spatial problem and speculate on urbanization at the global scale. Prerequisites: For non-majors: permission of the instructor is required. For ARCH majors: ARCH 150, 200, and 280.  HU  1½ Course cr

* ARCH 362a / URBN 362a, Urban Lab: City Making  Anthony Acciavatti
How architects represent, analyze, construct, and speculate on critical urban conditions as distinct approaches to city making. Investigation of a case study analyzing urban morphologies and the spatial systems of a city through diverse means of representation that address historical, social, political, and environmental issues. Through maps, diagrams, collages and text, students learn to understand spatial problems and project urban interventions. Prerequisites: For non-majors: permission of the instructor is required. For ARCH majors: ARCH 150, 200, and 280.  1½ Course cr

* ARCH 375a, American Gothic  Eeva-Liisa Pelkonen
This seminar explores the role Gothic architecture has played in modern cultural imaginary from the 18th century onward to its current use in popular culture. We explore the style's origins in philosophy, literature, and painting and its application to different media and its influence on our thinking about the creation and experience of art and architecture. We also consider whether Gothic style is constituted by particular type of structural and material logic or by certain type of aesthetic sensibility and atmosphere. Students use Yale's collegiate Gothic campus as a primary case study and James Gamble Rogers papers in Manuscripts and Archives in the Yale University Library as primary source material to explore these topics. Sterling Memorial Library and Payne Whitney Gymnasium – respectively the most modern library and the largest gymnasium in the world – are studied and analyzed in detail. The seminar considers the heated debates surrounding the completion of these buildings, and consider whether in its current use, the style should be considered a sign of anachronism and cultural anxiety or a model for an experimental and multi-medial approach to architecture and design.  HU
* ARCH 450a, Senior Studio  Turner Brooks and Adam Hopfner
Advanced problems with emphasis on architectural implications of contemporary cultural issues. The complex relationship among space, materials, and program. Emphasis on the development of representations—drawings and models—that effectively communicate architectural ideas. To be taken before ARCH 494. Enrollment limited to Architecture majors.  1½ Course cr

* ARCH 471a or b, Individual Tutorial  Bimal Mendis
Special courses may be established with individual members of the department only. The following conditions apply: (1) a prospectus describing the nature of the studio program and the readings to be covered must be approved by both the instructor and the director of undergraduate studies; (2) regular meetings must take place between student and instructor; (3) midterm and final reviews are required. For seniors with DUS approval; meetings by appointment with DUS.

* ARCH 490a / URBN 490a, Senior Research Colloquium  Marta Caldeira
Research and writing colloquium for seniors in the Urban Studies and History, Theory, and Criticism tracks. Under guidance of the instructor and members of the Architecture faculty, students define their research proposals, shape a bibliography, improve research skills, and seek criticism of individual research agendas. Requirements include proposal drafts, comparative case study analyses, presentations to faculty, and the formation of a visual argument. Guest speakers and class trips to exhibitions, lectures, and special collections encourage use of Yale’s resources.

* ARCH 491b / URBN 491b, Senior Project  Marta Caldeira
An essay or project in the student’s area of concentration. Students in the history, theory, and criticism track or in the urban studies track pursue independent research with an adviser; this project must terminate in a senior essay.

* ARCH 494b, Senior Project Design Studio  Steven Harris
Individual design investigations, focusing on independence and precision in the deployment of design ideas. Reliance on visual and nonverbal presentations. Development of a three-dimensional component, such as large-scale mock details, or other visual means of presentation, which might include photography, film, video, or interactive media. Examination of the skills, topics, and preparation to support design research.  1½ Course cr
