

# ENERGY STUDIES CERTIFICATE

**Certificate director:** Michael Oristaglio ([michael.oristaglio@yale.edu](mailto:michael.oristaglio@yale.edu)); [earth.yale.edu/energy-studies](http://earth.yale.edu/energy-studies)

The Interdisciplinary Certificate in Energy Studies is designed to provide undergraduates with the knowledge and skills needed for advanced studies, leadership, and success in energy-related fields through a curriculum requiring coursework in three multidisciplinary tracks: Energy Science & Technology, Energy & Environment, Energy & Society. Activities such as field trips, funded on-campus projects, and internships will be available to students interested in hands-on experience and training in the modern world of energy technology, finance, regulation, and policy. More information about the special activities is listed on the Energy Studies website.

## REQUIREMENTS

Students are required to complete two course credits in each of the three tracks of Energy Studies: (1) Energy Science & Technology, (2) Energy & Environment, (3) Energy & Society.

ENRG 300, Multidisciplinary Topics in World Energy—which is required as one of the six course credits (exceptions can be granted by the certificate director) and counts toward the Energy & Society track—should be taken during the junior or senior year.

ENRG 400, Senior Capstone Seminar, is not required, but is offered to students wishing to undertake a special energy-related project. ENRG 400 can count toward the six required course credits in any one of the three tracks, depending on the project's topic.

Approved courses are listed on the Energy Studies website and are searchable in Yale Course Search. Graduate and professional school courses and non-Yale courses accepted for full course credit by Yale College may count toward the certificate; language courses may not count toward the certificate. Students are invited to present syllabi to the certificate director for courses that they think might be suitable for fulfilling the requirements of the certificate. It is the discretion of the certificate director to approve all courses that meet the curated curriculum of the certificate.

No more than two course credits fulfilling the requirements of the Energy Studies Certificate may overlap with a major, a simultaneous degree, or another certificate. Additionally, no course credit may be applied toward the requirements of more than two curricular programs. For example, the same course credit may not be used to fulfill the requirements of two certificates and a major.

Yale Course Search **Searchable Attributes:**

- YC ENRG: Energy Science & Tech
- YC ENRG: Energy & Environment
- YC ENRG: Energy & Society

**Credit/D/Fail** Only one course taken Credit/D/Fail or one independent study course graded Pass/Fail may be counted toward the program.

**Declaration of Candidacy**

Students must submit a Declaration of Candidacy for a Certificate form, as early as possible, but at the very latest, before the start of the student's last semester at Yale. The form can be found on the University Registrar's Office website. Once declared, Degree Audit tracks students' progress toward completion of the certificate.

**SUMMARY OF REQUIREMENTS**

**Prerequisites** None

**Number of courses** 6 course credits

**Required course** ENRG 300

**Distribution of courses** 2 courses in each of the three tracks of Energy Studies listed above
